ADVICE COLUMN

Some advice on sitting:

- 1) Keep the small of your back against the back of the seat. The chair should hug your back.
- 2) The chair should be firm enough so that you don't automatically sink into a slouch position.
- 3) Seat backs should begin to contact ehb ack 4-6 inches above the seat so that the derriere cannot slip under the backrest. Backs should provide a flat support at least through the upper lumbar area.
